

Requirement Specification Document

Relay AI

1. Project Overview

Objective

Relay AI is a lead-generation and connection platform designed to help users find relevant **Development** and **Marketing** service providers based on their requirements.

The website will allow potential customers to:

1. Learn about Relay AI.
2. Explore Development and Marketing services.
3. Submit their contact information.
4. Select whether they are looking for Development or Marketing.
5. Submit their enquiry to Relay AI.

Once an enquiry is received, the **Relay AI team will manually review the requirement**, identify a relevant partner/client from their network, and share the relevant partner's details with the user.

The website will therefore function primarily as a **lead-generation and partner-connection platform**, rather than as a direct service-delivery platform.

2. Business Objective

The primary business problem is that potential customer enquiries can be missed or lost due to the volume of incoming calls and enquiries.

Relay AI will provide a centralized digital channel where users can submit their requirements.

Instead of relying on calls or informal communication, every enquiry will be captured and stored.

The Relay AI team can then:

- Review the enquiry.

- Understand the user's requirement.
- Identify the most relevant partner.
- Share the partner's details with the user.
- Allow the user and partner to continue the conversation directly.

Core Business Flow

User → Relay AI → Enquiry → Requirement Review → Partner Matching → Partner Details Shared → User Connects With Partner

3. Target Audience

The website will target businesses, entrepreneurs, startups, and individuals looking for professional services.

Development Requirements

Potential users may be looking for:

- Website Development
- Mobile App Development
- Web Application Development
- Custom Software Development
- AI Development
- SaaS Development
- MVP Development
- API & Backend Development
- UI/UX Development
- Other technology solutions

Marketing Requirements

Potential users may be looking for:

- Digital Marketing
- SEO
- Social Media Marketing
- Performance Marketing
- Paid Advertising
- Lead Generation

- Content Marketing
 - Branding
 - Email Marketing
 - Other marketing services
-

4. Website Goals

The Relay AI website should:

- Clearly communicate what Relay AI does.
 - Explain the Development and Marketing categories.
 - Build trust with potential customers.
 - Explain how the Relay AI connection process works.
 - Make it extremely easy to submit an enquiry.
 - Capture basic customer information.
 - Categorize enquiries into Development or Marketing.
 - Notify the Relay AI team when an enquiry is submitted.
 - Store enquiries so that no potential lead is lost.
-

5. Website Structure

Since Relay AI is required to be a **one-page website**, all content will be presented on a single responsive page.

Main Sections

1. Header
 2. Hero Section
 3. Services
 4. How Relay AI Works
 5. Why Relay AI
 6. Development & Marketing Highlights
 7. Trust / Portfolio / Statistics
 8. FAQ
 9. Enquiry Form
 10. Footer
-

6. Header

The header should contain:

Logo

Relay AI

Navigation

Since this is a one-page website, navigation links should scroll to the relevant sections:

- Services
- How It Works
- Why Relay AI
- FAQ

Primary CTA

Submit Your Requirement

Clicking this CTA should scroll directly to the enquiry form.

The header may remain sticky while the user scrolls.

7. Hero Section

The Hero section should immediately explain Relay AI's purpose.

Suggested Headline

Find the Right Development or Marketing Partner for Your Business

Supporting Text

Tell Relay AI what you're looking for. We'll review your requirement and help connect you with a relevant partner from our network.

Primary CTA

Submit Your Requirement

Secondary CTA

Explore Services

The secondary CTA should scroll to the Services section.

8. Services Section

The Services section should introduce Relay AI's two primary service categories.

The section should visually separate **Development** and **Marketing**.

8.1 Development

Heading

Development

Description

From websites and mobile apps to AI-powered products and custom software, connect with development expertise relevant to your requirement.

Services

- Website Development
- Mobile App Development
- Custom Software
- AI Development
- SaaS Development
- MVP Development
- Web Applications
- API & Backend Development

CTA

I Need Development

The CTA should scroll to the enquiry form and optionally pre-select **Development**.

8.2 Marketing

Heading

Marketing

Description

Find relevant marketing expertise to help grow your business, generate leads, build your brand, and reach the right audience.

Services

- Digital Marketing
- SEO
- Social Media Marketing
- Performance Marketing
- Paid Advertising
- Lead Generation
- Content Marketing
- Branding

CTA

I Need Marketing

The CTA should scroll to the enquiry form and optionally pre-select **Marketing**.

9. How Relay AI Works

This section should clearly explain the Relay AI process.

A simple four-step visual process should be used.

01 — Tell Us What You Need

Submit your basic contact details and tell us whether you're looking for Development or Marketing services.

02 — Relay AI Reviews Your Requirement

The Relay AI team reviews your enquiry and understands what type of service provider would be relevant.

03 — We Find the Right Partner

Relay AI identifies a relevant partner from its network based on the requirement.

04 — We Connect You

The relevant partner's details are shared with you so you can connect with them directly.

Visual Flow

Submit → Review → Match → Connect

10. Why Relay AI?

This section should communicate the key benefits of using Relay AI.

Relevant Connections

Relay AI helps connect users with service providers relevant to their requirements.

Save Time

Users don't need to spend hours searching through multiple service providers.

One Simple Enquiry

Submit your requirement through one simple form.

Development & Marketing

Relay AI supports both technology and marketing-related requirements.

Human Review

Enquiries are reviewed by the Relay AI team before a relevant partner is identified.

Network-Based Approach

Relay AI leverages its network to identify potentially suitable service providers.

11. Development & Marketing Highlight Section

A visually engaging section can reinforce Relay AI's two primary categories.

Development

Heading

Have an idea that needs to be built?

Supporting text:

Whether you need a website, mobile application, SaaS product, AI solution, or custom software, tell Relay AI what you're looking for.

CTA: **Find a Development Partner**

Marketing

Heading

Ready to grow your business?

Supporting text:

From SEO and social media to performance marketing and lead generation, tell Relay AI what you need and we'll review your requirement.

CTA:

Find a Marketing Partner

12. Trust / Credibility Section

This section should build confidence in Relay AI.

Depending on available information, the section may contain:

- Client logos
- Partner logos
- Number of projects
- Number of businesses served
- Years of experience
- Industries covered
- Testimonials
- Case studies

Example

50+ Projects

20+ Businesses

Multiple Industries

Actual statistics should only be used if they are factually accurate.

13. FAQ Section

The FAQ section should answer common questions.

What is Relay AI?

Relay AI helps users connect with relevant Development and Marketing service providers based on their requirements.

What happens after I submit an enquiry?

The Relay AI team reviews your enquiry and looks for a relevant partner from its network.

Do I need to provide detailed project information?

No. The initial enquiry only requires your basic contact details and service category.

Can I submit a Development requirement?

Yes. Relay AI accepts Development-related enquiries.

Can I submit a Marketing requirement?

Yes. Relay AI accepts Marketing-related enquiries.

Will I definitely be connected with a partner?

A match is not guaranteed. Relay AI reviews each enquiry and, where a relevant partner is available, their details can be shared with you.

Does Relay AI provide the services directly?

This answer should be finalized based on the actual business model. If Relay AI acts only as a connector, the website should clearly communicate that Relay AI connects users with relevant partners rather than directly delivering every service.

14. Enquiry Section

The enquiry form is the **primary conversion point** of the website.

Heading

Tell Us What You're Looking For

Supporting Text

Share your details and let Relay AI know whether you're looking for Development or Marketing services. We'll review your enquiry and look for a relevant connection.

15. Enquiry Form

The initial form should remain intentionally simple to reduce friction.

Field 1 — Full Name

Required

Field 2 — Email Address

Required

Field 3 — Phone Number

Required

Field 4 — What Are You Looking For?

Required

Options:

- Development
- Marketing

Submit Button

Submit My Requirement

16. Form Validation

The form should validate:

Name

- Required
- Should not accept an empty value.

Email

- Required
- Valid email format.

Phone

- Required
- Valid phone number format.

Requirement

- Required.
- User must select Development or Marketing.

An appropriate validation message should be displayed if information is missing or invalid.

17. Enquiry Submission Flow

Once the user clicks **Submit My Requirement**:

1. Form information is validated.
 2. Enquiry is stored.
 3. Enquiry receives a unique ID.
 4. Development/Marketing category is recorded.
 5. Relay AI team receives a notification.
 6. User sees a confirmation message.
-

18. User Confirmation

After successful submission, the user should see:

Thank You! Your Enquiry Has Been Received.

Supporting message:

We've received your requirement and the Relay AI team will review it. If we identify a relevant partner from our network, we'll share their details with you.

The user can then return to the homepage.

19. Relay AI Enquiry Notification

Whenever an enquiry is submitted, the Relay AI team should receive an email notification.

Notification Information

New Relay AI Enquiry

- Enquiry ID
- Name
- Email
- Phone
- Requirement
- Submission Date & Time

Example

Enquiry ID: RLY-00125

Name: John Doe

Email: john@example.com

Phone: +91 XXXXX XXXXX

Requirement: Development

Date: 10 August 2026

20. Enquiry Storage

Every enquiry should be stored securely.

Required Information

Field	Description
Enquiry ID	Unique enquiry identifier
Name	User's full name
Email	User's email
Phone	User's phone number
Requirement	Development / Marketing

Date	Submission date
Time	Submission time
Status	Current enquiry status

Optional tracking fields:

- Source
 - Campaign
 - UTM parameters
 - Landing page
-

21. Enquiry Status

The internal enquiry process can use the following statuses:

New

New enquiry received.

Under Review

Relay AI team is reviewing the requirement.

Matched

A relevant partner has been identified.

Details Shared

Partner details have been shared with the user.

Closed

The enquiry is no longer active.

22. Partner Matching Process

The actual matching process will initially be performed manually by the Relay AI team.

Example

New Enquiry

User requires:

Mobile Application Development

↓

Relay AI reviews the enquiry.

↓

Relay AI checks its partner network.

↓

Relevant partner identified:

Partner A — Mobile App Development

↓

Relay AI shares Partner A's details with the user.

↓

User contacts Partner A directly.

23. Partner Information

Partner/client information does **not need to be publicly displayed on the website**.

The Relay AI team may maintain this information separately.

Potential partner information may include:

- Company Name
- Contact Person
- Email
- Phone

- Website
- Services
- Industry Expertise
- Technologies
- Location
- Portfolio
- Internal Notes

This can become part of a future partner management system.

24. CTA Strategy

The primary CTA across the entire website should be:

Submit Your Requirement

Other CTA variations:

- Get Started
- Tell Us What You Need
- Find a Development Partner
- Find a Marketing Partner
- Start Your Enquiry

All primary CTAs should ultimately lead to the enquiry form.

25. Footer

The footer should contain:

Relay AI

Short description:

Connecting businesses with relevant Development and Marketing expertise.

Navigation

- Services
- How It Works
- Why Relay AI
- FAQ

Contact

- Email
- Phone, if applicable
- Social media links

Legal

- Privacy Policy
 - Terms & Conditions
-

26. Responsive Design

The website must be responsive across:

- Desktop
- Laptop
- Tablet
- Mobile

Mobile Requirements

- Easy-to-use navigation
- Large CTA buttons
- Readable typography
- Single-column layouts
- Simple enquiry form
- No horizontal scrolling
- Fast loading

The enquiry form should be particularly optimized for mobile users.

27. UI/UX Requirements

The overall design should communicate:

- Modern
- Professional
- Trustworthy
- Technology-focused
- Simple
- Conversion-oriented

The page should not feel like a complicated marketplace.

The main user journey should remain obvious:

Understand Relay AI → Explore Services → Understand Process → Submit Requirement

28. Recommended Visual Hierarchy

The one-page website should follow this structure:

29. SEO Requirements

Although Relay AI is a one-page website, it should be SEO-ready.

Requirements

- SEO-friendly page title
- Meta description
- One primary H1
- Proper H2/H3 hierarchy
- Image alt text
- Open Graph metadata
- Sitemap
- Robots.txt
- Fast loading
- Mobile optimization
- Structured data where appropriate

Potential keyword themes:

- Development partner
 - Software development partner
 - Website development
 - Mobile app development
 - Digital marketing
 - SEO services
 - Marketing partner
 - Find development company
 - Find marketing agency
-

30. Analytics

Analytics should be implemented to measure the enquiry funnel.

Events to Track

- Hero CTA click
- Services CTA click
- Development CTA click
- Marketing CTA click
- Enquiry form opened
- Form started
- Form submitted
- Development selected
- Marketing selected

Recommended Tools

- Google Analytics
 - Google Tag Manager
 - Google Search Console
-

31. Security

The website should implement:

- HTTPS
- Secure form submission
- Client-side validation
- Server-side validation
- Spam protection
- CAPTCHA if required
- Secure enquiry storage
- Protected access to enquiry information

User contact details should never be publicly exposed.

32. MVP Scope

One-Page Website

- Header
- Hero
- Services
- How It Works
- Why Relay AI
- Development/Marketing Highlight
- Trust/Portfolio
- FAQ
- Enquiry Form
- Footer

Lead Capture

- Full Name
- Email
- Phone
- Development/Marketing selection

Backend

- Store enquiries
- Generate enquiry ID
- Send notification to Relay AI
- Store submission date/time

Confirmation

- Successful submission message
 - Optional confirmation email to user
-

33. Out of Scope for MVP

The following features are **not required** in the first version:

- Call booking
- Calendar integration
- Meeting scheduling
- User login
- User dashboard
- Partner login
- Public partner directory
- Automated partner matching
- CRM
- Payment gateway
- Chat functionality
- Automated partner-detail sharing
- Lead scoring

These can be considered in future phases.

34. Future Enhancements

As Relay AI grows, the website can evolve into a complete lead-matching platform.

Partner Management

- Partner database
- Partner profiles
- Service categories
- Partner availability
- Active/inactive partners

Lead Management

- Lead dashboard
- Lead status
- Internal notes
- Follow-up tracking

Automated Matching

The system can eventually match enquiries based on:

- Service
- Industry
- Technology
- Location
- Budget
- Experience
- Partner specialization

Automated Introduction

Relay AI could eventually allow the team to select a partner and automatically send the partner's details to the user.

Analytics

Track:

- Total enquiries
- Development enquiries
- Marketing enquiries
- Matches

- Connections
 - Conversions
-

35. Complete Business Flow

36. Core Product Proposition

The core message of Relay AI should be:

Tell us what you need. We'll help connect you with the right Development or Marketing partner.

The website should therefore be designed around one primary conversion goal:

Generate Quality Enquiries

The website is not intended to complete the entire sales/service process. Its role is to **attract potential customers, capture their requirements, and create an opportunity for Relay AI to connect them with a relevant partner.**

37. Success Criteria

The Relay AI website will be considered successful when:

1. Visitors immediately understand what Relay AI does.
 2. Development and Marketing services are clearly differentiated.
 3. Users can understand the matching process.
 4. Users can submit an enquiry within a few steps.
 5. Every enquiry is captured securely.
 6. Relay AI receives an immediate notification for every enquiry.
 7. Enquiries are categorized as Development or Marketing.
 8. The Relay AI team can review enquiries without relying solely on emails.
 9. The website generates qualified leads.
 10. The website provides a professional and trustworthy brand experience.
-

38. Final One-Line User Journey

Discover Relay AI → Choose Development or Marketing → Submit Your Requirement → Relay AI Reviews → Relevant Partner Identified → Partner Details Shared → Connect

39. Primary Website CTA

Submit Your Requirement

This should be the dominant CTA across the entire Relay AI website and should always lead users toward the enquiry form.
